**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, drawn to method and apparatus of combining liquid and filler material, classified in class 222, subclass 216.
  - II. Claim 11, drawn to a spray gun nozzle, classified in class 222, subclass 412.
  - III. Claim 12, drawn to method of metering material, classified in class 222, subclass 321.1.
  - IV. Claims 13-16, drawn to method of treating material, classified in class 239, subclass 101.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and II, III, IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of Group I does not require the spray gun nozzle of Group II, the spray gun of Group II does not require the method of metering of group III, and the metering material of Group III does not require to pre-treat material of group IV.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
